LETTER FROM OUR PRESIDENT

My great-grandfather started Williams & Heintz in 1921. As president of the family business, my values and visions have a defining impact on this company, as did the values and visions of generations before me.

I value corporate social responsibility. Aside from just offering health benefits to our employees, we also have a living wage policy instead of paying the prevailing industry wages. We provide sufficient income for the worker to survive and remain healthy and comfortable, given the local cost of living, because it is the right thing to do.

I value our environment. Williams & Heintz Map Corporation is a sustainable printer whose green initiatives are not just a marketing tool; today at Williams & Heintz, we employ materials and practices that are as kind to the environment as possible, to minimize the impact of this environmentally and energy intensive process, and to maintain a good healthy workplace.

My vision is to see Williams & Heintz grow as a superior cartographic printing company that embraces ecologically sustainable practices and that cares about the people in our community. Because of these values and vision, our environmental philosophy and policy is to monitor everything we do to insure compliance, continuous improvement, and to go beyond legal requirements.

- We commit to educating customers to assist them in making environmentally sensitive choices.
- We commit to educating our employees to foster understanding that will carry over between work and home.
- We commit to educating vendors and promote partnerships that support environmental and social responsibility.

Sincerely,

A handwritten signature in black ink that reads "Holly Heintz Budd". The signature is fluid and cursive, with the first letters of each name being capitalized and prominent.

Holly Heintz Budd, President
